

INSTAGRAM BOT GUIDE

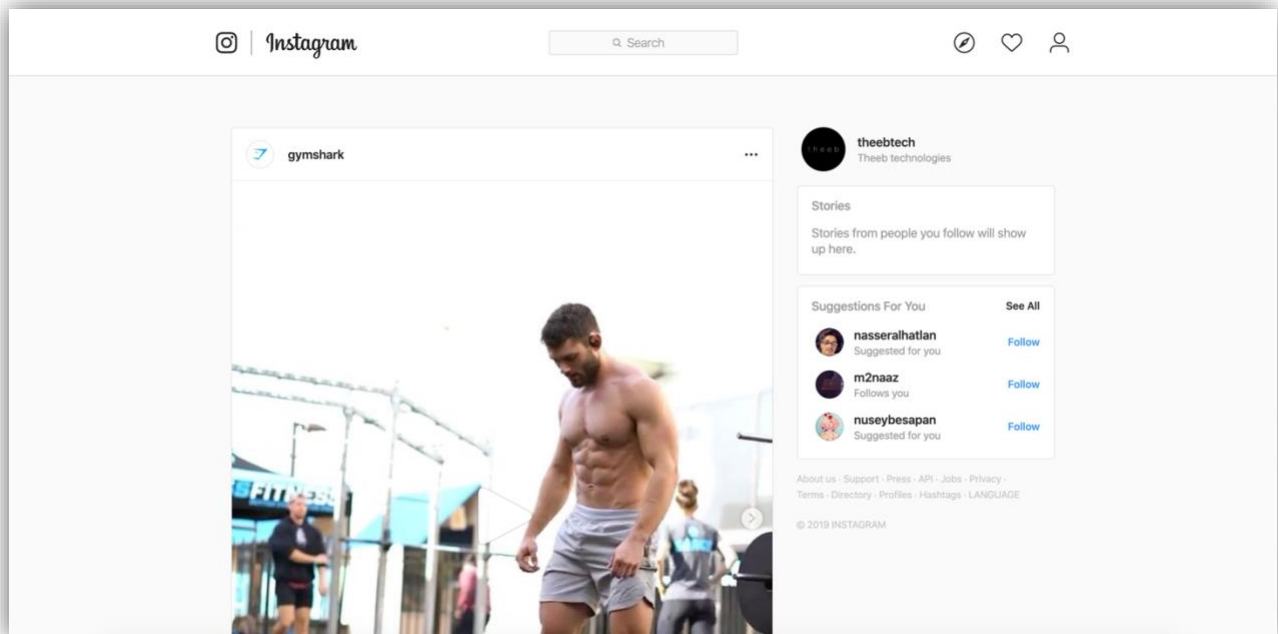

this bot is used to auto like or auto follow or auto like and follow every post in a hash tag or the explore page follow simple steps bellow to use this bot,

Note : you need to down load google chrome browser to use this bot ,

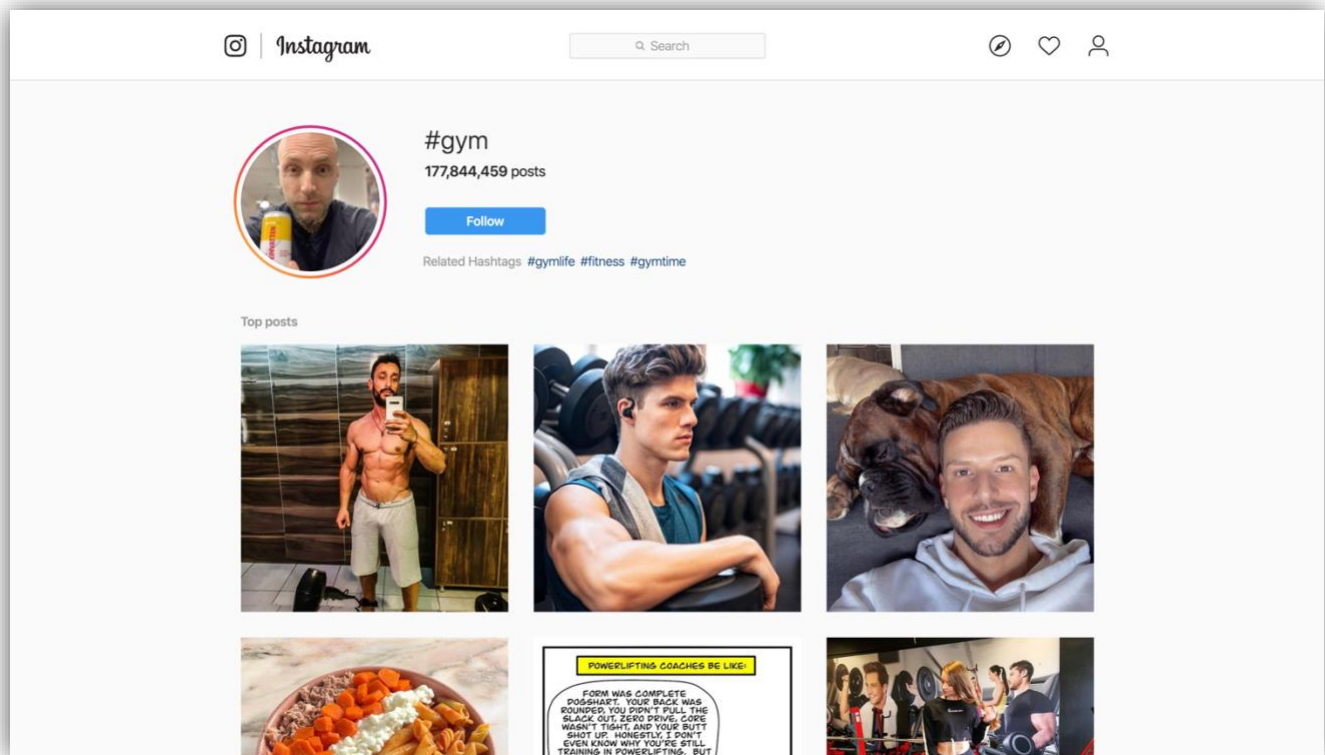

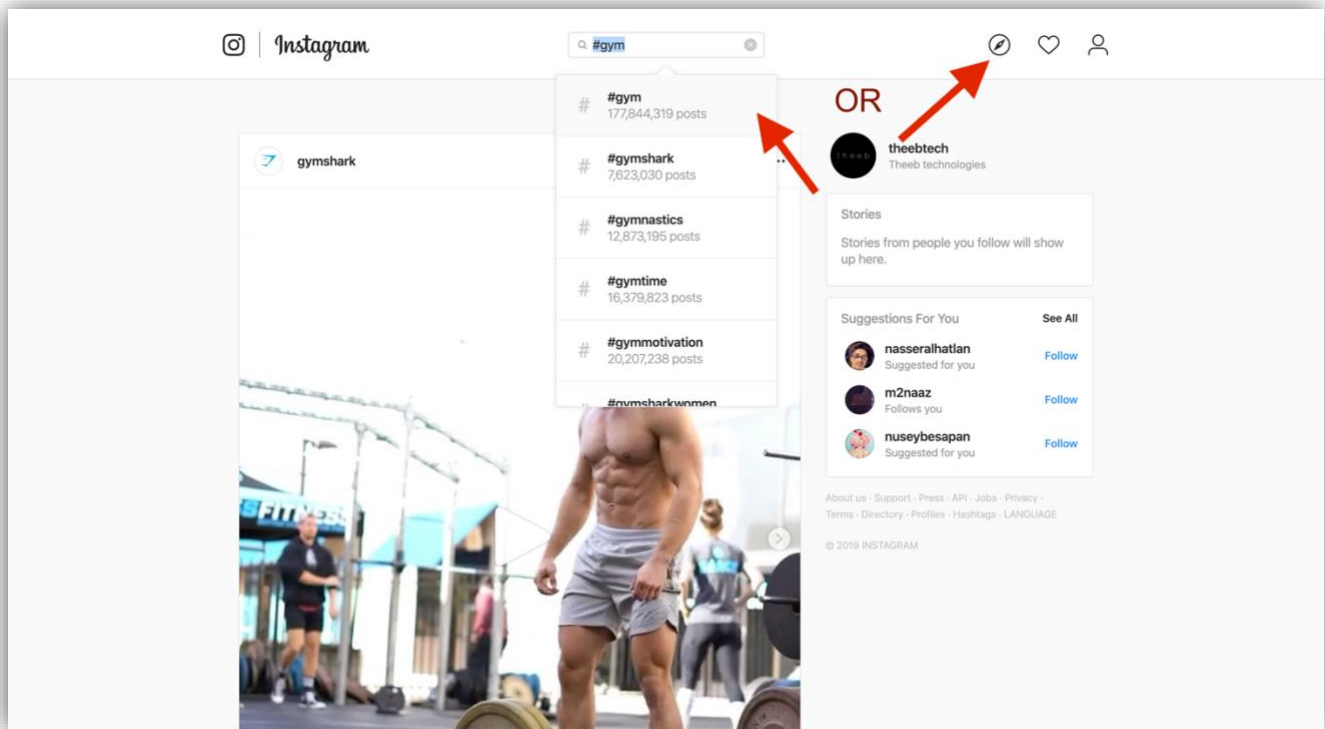

1 - First step is to open google chrome browser

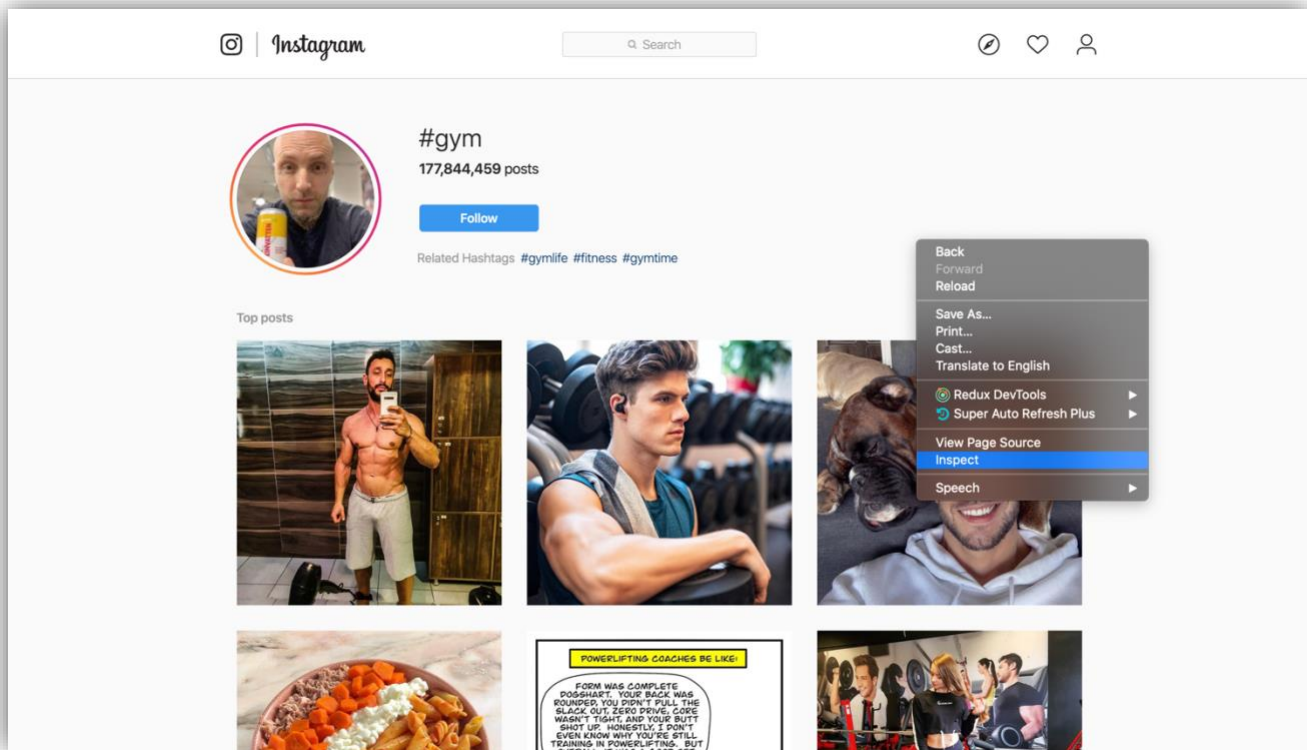

2 - login to your Instagram account

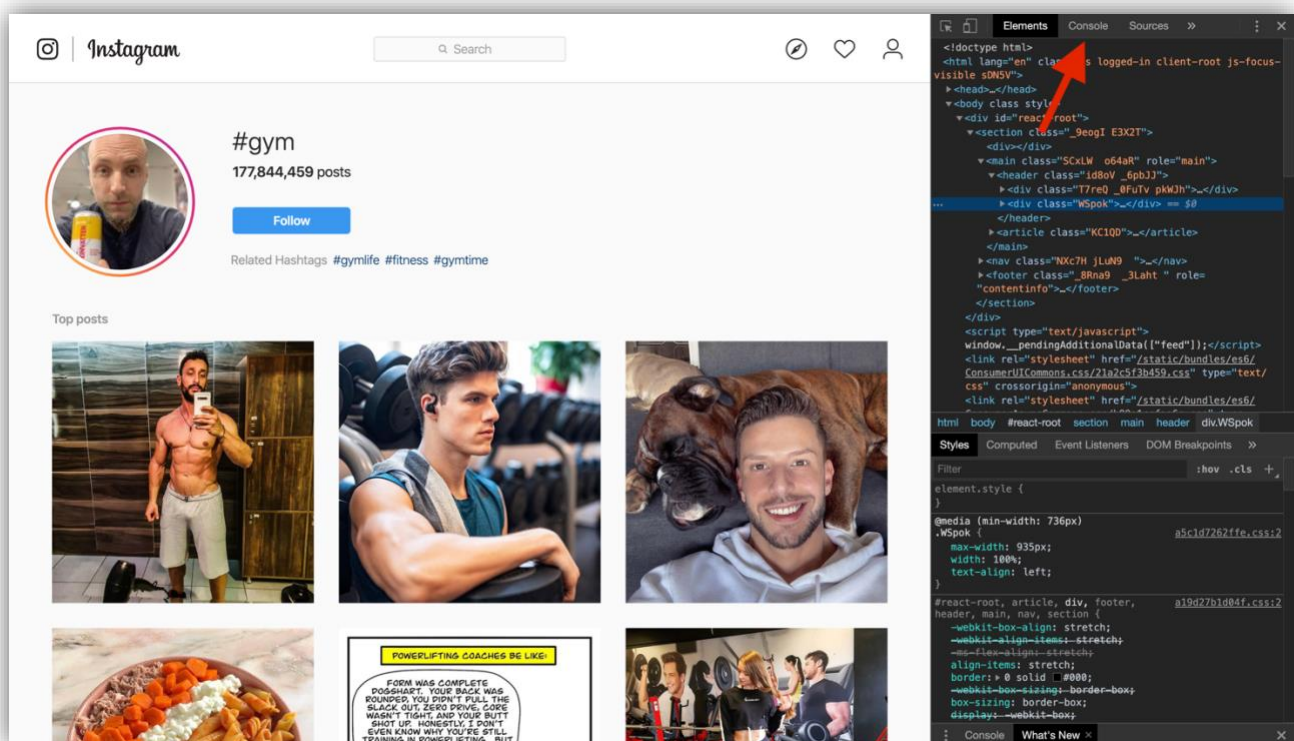

3 - open explore page or open any hashtag

4 - after opening the explore page or hashtag page right click and choose the option "inspect"

5 - choose the "console" tap in the menu

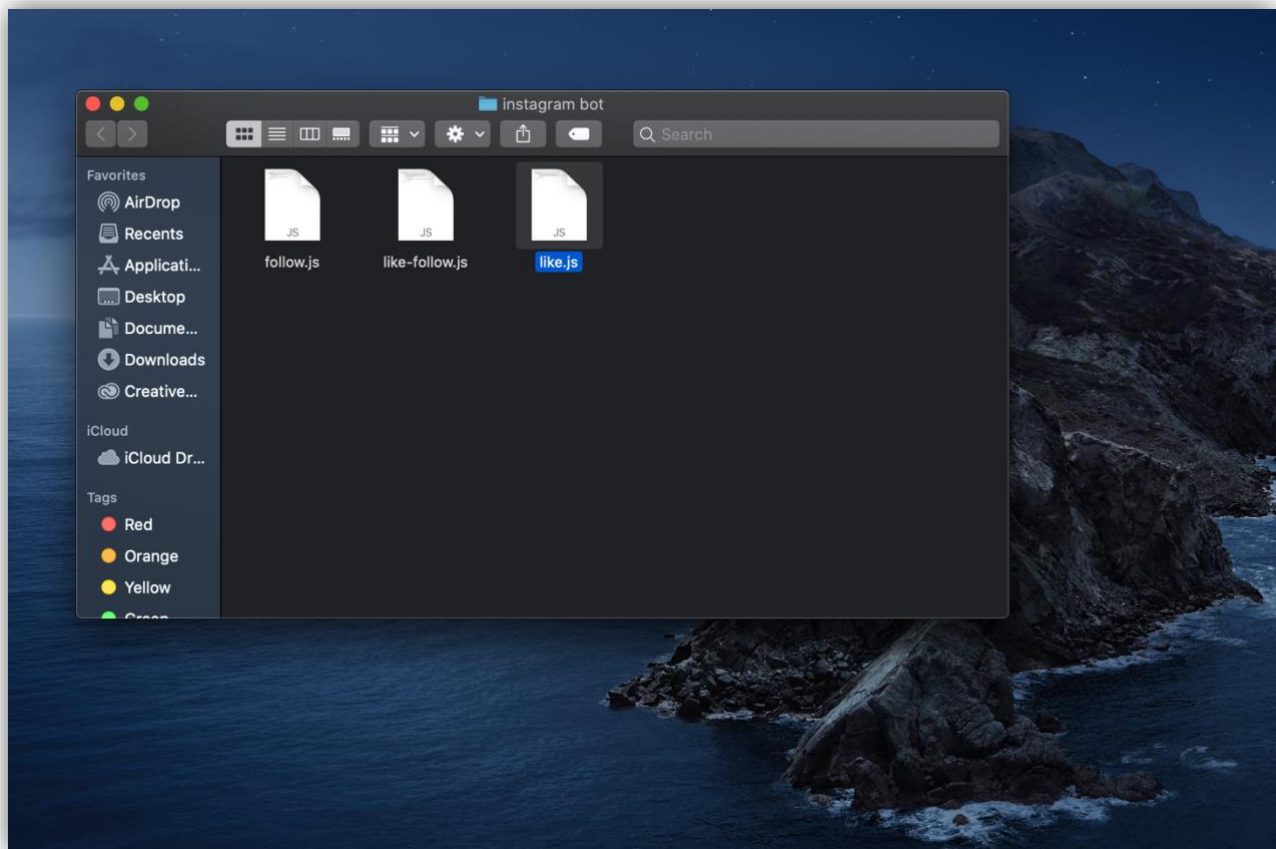

6 - open the Instagram bot folder and choose one of the three scripts like or follow or like-follow , open in it in any text editor and copy the script and go back to google chrome

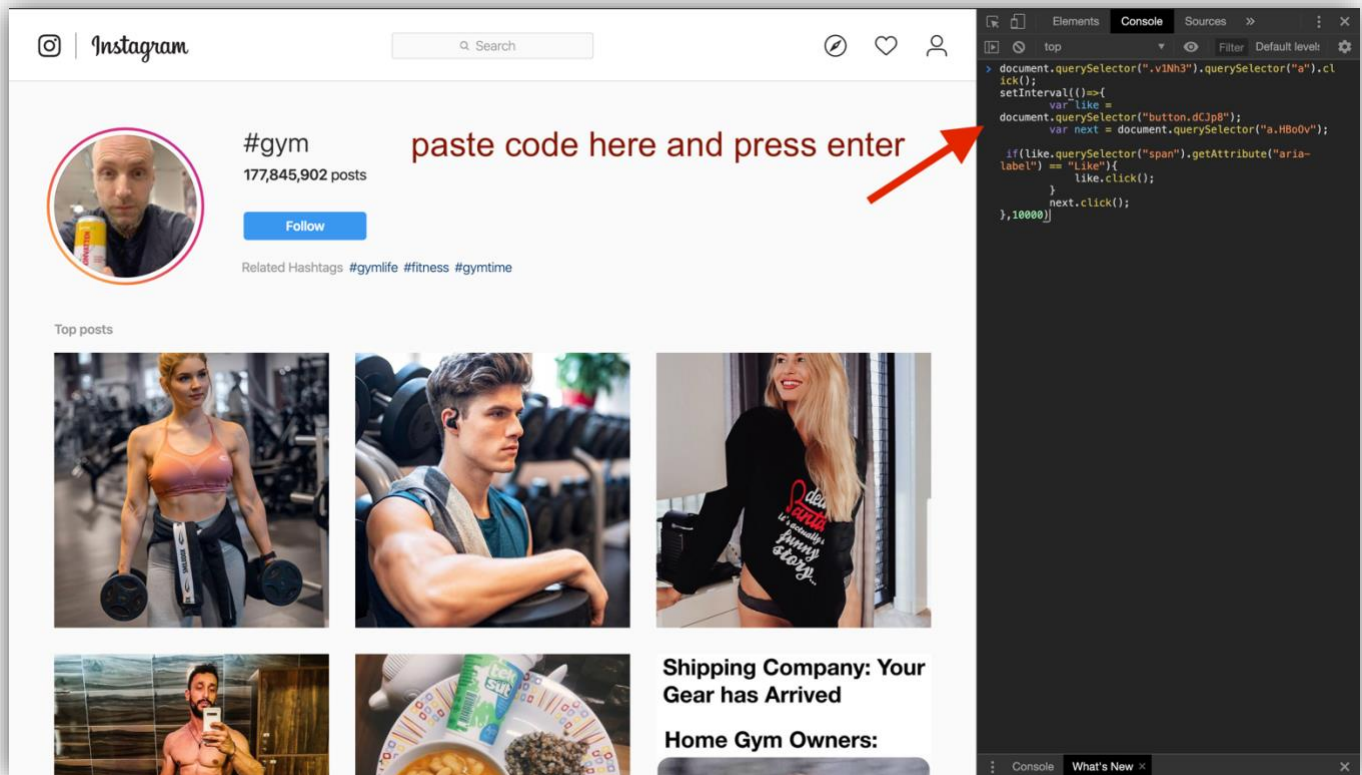

like script = auto like every post in the page

follow script = auto follow every post in the page

like-follow script = auto like and follow every post in the page

7 - paste the script you copied to the console here and press enter , the script will do the job for each post and wait for 10s and go the next ,So it will like or follow or like and follow every post every 10s , we set it to 10s to avoid Instagram security

The screenshot shows the Instagram homepage with the search bar at the top. The main content area displays the '#gym' hashtag page, featuring a profile picture of a man, a 'Follow' button, and a grid of top posts. A red arrow points to the browser console on the right, which contains the following JavaScript code:

```
> document.querySelector(".v1Nh3").querySelector("a").click();
setInterval(()=>{
  var like =
  document.querySelector("button.dCjp8");
  var next = document.querySelector("a.HBo0v");
  if(like.querySelector("span").getAttribute("aria-label") == "Like"){
    like.click();
  }
  next.click();
},10000)
```

Below the grid of posts, there is a section titled 'Shipping Company: Your Gear has Arrived' and 'Home Gym Owners:'.
